Offset	Register	Description
0	ISR	Interrupt Status Register
4	IER	Interrupt Enable Register
8	IER_set	Each bit written as one will set the corresponding bit in IER
C	IER_clr	Each bit written as one will clr the corresponding bit in IER
10	FIR	Force Interrupt Register
14	FIR_set	Each bit written as one will set the corresponding bit in FIR
18	FIR_clr	Each bit written as one will clr the corresponding bit in FIR
1C	IMX	Interrupt Mux Register ('1/0' Routes interrupt to nFIQ/nIRQ
20	IMX_set	Each bit written as one will set the corresponding bit in IMX
24	IMX_clr	Each bit written as one will clr the corresponding bit in IMX
28	VIR	Read only Valid Interrupt Register for nIRQ
2C	FVIR	Read only Fast Valid Interrupt Register for nFIQ
